## Armida Technologies Announces Reseller Agreement with Exacq Technologies

SAN ANTONIO--(BUSINESS WIRE)--Armida Technologies, manufacturer of innovative wireless video security products, announces the signing of a unique reseller agreement with Exacq Technologies. The agreement will allow Armida to offer the exacqVision NVR software as an option with the ArmidaWare SecurityController.

According to Bill Lawrence, CEO of Armida Technologies, "We found a great match for our SecurityController in the exacqVision NVR software. Both products' open architecture allows our customers optimal flexibility and scalability in wireless video surveillance – whether upgrading infrastructure or configuring a new system. We are pleased to partner with Exacq to offer this product."

David Underwood, President of Exacq Technologies adds, "Armida's wireless video technology products are a natural fit with our [exacqVision](#) NVR solution, allowing their customers to configure a system that will meet their current video surveillance needs while allowing room for growth."

About Exacq Technologies:

Based in Indianapolis, Exacq Technologies was created by a group that pioneered the digital video surveillance industry. Exacq is a manufacturer of IP and hybrid network digital video recording systems and OEM products for the security industry. For more information visit [www.exacq.com](http://www.exacq.com) or contact Thomas Buckley, Director of Sales & Marketing at 317-845-5710.

About Armida Technologies:

Armida Technologies, established in 2004, develops products that deliver ultra-reliable high-quality video over standard wireless networks for commercial, industrial, and government customers. Armida's flagship product, the [SecurityController](#), includes:

- Ability to feed video from up to 8 cameras (analog, digital, wired or wireless)
- 802.11 a/b/g WiFi, 900 MHz, 4.9 GHz, or 802.16 WiMAX connectivity
- Ability to function as a DHCP server and wireless access point
- Power over Ethernet (PoE)
- Ruggedized enclosure for outdoor use
- Long range transmission capability

Armida's patent-pending Videlity™ software mitigates packet loss that exists in traditional wireless networks, providing reliable transmission of video while overcoming typical interference and degradation. To see why Armida provides the *performance of cable with the freedom of wireless*, visit [www.armidatechnologies.com](http://www.armidatechnologies.com) or contact [Sloan Foster](#), Chief Marketing Officer, at (888) 344-9834.
