FOR IMMEDIATE RELEASE AT ASIS 2007

## **Armida Technologies and BlueWave Security Introduce “Security in a Box”**

**San Antonio – September 24, 2007** – Armida Technologies is pleased to announce a technology alliance with BlueWave Security, The Wi-Fi Lock and Security Company. This alliance will combine Armida’s ultra-reliable wireless streaming video with BlueWave’s wireless physical access control to provide a complete industrial strength “video and access control solution in-a-box.”

Under this agreement, BlueWave and Armida Technologies will join forces to create a portfolio of integrated solutions providing simplified integration of video verification, surveillance and wireless access control.

“Today’s announcement is a milestone in our efforts to deliver integrated, enterprise class access control and video surveillance. This alliance provides customers an integrated, cost-effective, reliable solution providing true value in an emerging market,” said Bill Lawrence, CEO of Armida Technologies.

“With the rapid convergence of traditional CCTV camera systems and physical access control onto industry standard wired Ethernet and wireless Wi-Fi networks, our combined Armida and BlueWave solution brings two best-of-breed technologies into one solution for our customer base for both video and physical security,” said Mance Harmon, President and CEO of BlueWave Security.

The integrated product will be available through the BlueWave Security and Armida Technology channels beginning the first quarter of 2008. A demonstration of the featured product can be viewed both at the Armida Technologies suite (#1432 at the Renaissance Las Vegas Hotel) or at the BlueWave Security booth (#2834) at the ASIS conference in Las Vegas, September 24<sup>th</sup>-27<sup>th</sup>.

### **About Armida Technologies:**

Armida Technologies, established in 2004, develops products that deliver ultra-reliable high-quality video over standard wireless networks for commercial, industrial, and government customers.

Armida's patent-pending Videlity® software mitigates packet loss that exists in traditional wireless networks, providing reliable transmission of video while overcoming typical interference and degradation. To see why Armida provides the *performance of cable with the freedom of wireless*, visit [www.armidatechnologies.com](http://www.armidatechnologies.com) or contact Sloan Foster, Chief Marketing Officer, at (888) 344-9834.

### **About BlueWave Security**

BlueWave Security, The Wi-Fi Lock and Security Company™, is the industry-leading provider of Wi-Fi technology components and solutions to manufacturers and system integrators in the physical security industry. BlueWave product solutions reduce customer costs while improving product capabilities by leveraging existing IP networks. The company is privately held and headquartered in Austin, Texas. Information about BlueWave Security can be found at <http://www.bluewavesecurity.com>.
