## **Armida Technologies Selected as One of Access Control and Security System's Top 20 Finalists for 2007 New Product of the Year Award**

ASIS International 2007

SAN ANTONIO--(BUSINESS WIRE)--Access Control and Security System magazine has selected Armida Technologies as one of their 20 finalists for their sixth annual "New Product of the Year" competition.

The nationally based magazine, with over 36,000 readers, announced Armida as a finalist during the ASIS convention held this week in Las Vegas.

"Being selected by this magazine, mentioned in the same class as industry-leading veterans such as Bosch, Pelco and HID, is quite an accomplishment," said Bill Lawrence, CEO and President of Armida Technologies.

The magazine's readers will be able to vote on Armida and the 19 other companies and their products after their October issue is mailed to its readers. Readers can go online to the [www.securitysolutions.com](http://www.securitysolutions.com) web site to vote for the winner which will be announced in the December issue.

### **About Armida Technologies:**

Armida Technologies, established in 2004, develops products that deliver ultra-reliable high-quality video over standard wireless networks for commercial, industrial, and government customers. Armida's flagship product, the [SecurityController](#), includes:

- Ability to feed video from up to 8 cameras (analog, digital, wired or wireless, including PTZ functionality)
- 802.11 a/b/g WiFi, 900 MHz, 4.9 GHz, WiMAX-ready
- Ability to function as a DHCP server and wireless access point
- Provides power to Power over Ethernet (PoE) cameras
- Extended temperature design suitable for outdoor use
- Long-range transmission capability

Armida's patent-pending Videlity® software mitigates packet loss that exists in traditional wireless networks, providing reliable transmission of video while overcoming typical interference and degradation.
